SUMMARY

Motivated software developer with experience in cloud-native applications, and building CI-CD pipelines. Proficient in multiple programming languages and frameworks, with experience in teaching and mentoring. Effective in collaborative environments and taking community initiatives.

SKILLS

Languages: Java, Python, C/C++, SQL (MySQL), JavaScript, TypeScript, Swift

Frameworks and Tools: React, Node.js, Angular, Kubernetes, Git, Docker, Google Cloud Platform (GCP), Amazon Web Services (AWS), Microsoft Azure, Snyk, Dynatrace, Cloud Foundry, Linux

EDUCATION

New York University

Master of Science in Computer Engineering

New York, USA

Sep. 2024 – May 2026

Shiv Nadar University

Bachelor of Technology in Computer Science and Engineering

Delhi-NCR, India

Aug. 2020 – May 2024

EXPERIENCE

Software Engineer Intern

Dell Technologies

May 2023 – May 2024

Bengaluru, India

- Built and modernized three internal cloud-native applications, enhancing security and modularity, which **resulted in a 30% reduction in load times** as reported by Dynatrace.
- Reduced application vulnerabilities by over 50%** and **improved the internal DevOps maturity score to over 90%** by improving CI/CD pipelines and updating deprecated Angular applications to the latest versions, APIs, and dependencies.

Teaching Assistant

Shiv Nadar University

Jan 2023 – April 2023

Delhi-NCR, India

- Supported the professor in preparing and conducting lectures and assignments for the Operating Systems class, ensuring efficient course delivery and the smooth conduct of **12 graded assignments and 2 exams**.
- Conducted 12 lab sessions and assisted 130 students** with complex concepts such as memory management and process scheduling.

Chairperson

ACM SNU Student Chapter

Jan 2022 – Feb 2023

Delhi-NCR, India

- Collaborated with the developer community to host university's flagship hackathon, Glitch. Facilitated sessions with academia experts to get undergraduates started with research in Computer Science.

Head Coordinator

Google Developer Student Clubs

Jan 2022 – Feb 2023

Delhi-NCR, India

- Coordinated with Google India UR to organize events focused on Google Technologies like GCP and Android. Moderated networking sessions with experts and coding events centered on these technologies.

PROJECTS

Kabootar | *React, TypeScript, Golang, Docker* | *Peer-to-Peer File Sharing* — kabootar.meghrathod.dev

- Leveraged WebRTC and optimized APIs to enable fast and secure real-time file transfers, deploying it as a containerized progressive web application (PWA), benefiting **over 200 monthly active users** within my class and university community.
- Developed a Golang-based signalling protocol using WebSockets to facilitate seamless peer discovery and connection management in a P2P file-sharing environment.

Friday | *Python, React, JavaScript, MySQL* | *Automated Code Checking* — friday.meghrathod.dev

- Designed and deployed a grading utility for projects in Java, C++, and Python, streamlining the evaluation process for 130 submissions and **reducing manual grading time by over 40 hours**.
- Developed a modular architecture with a responsive user interface for teachers to analyze student reports, allowing future integration of features like plagiarism detection and support for additional programming languages.
